

Leica BLK360 – Release notes

Firmware version 3.2.2 – September 23rd, 2026.

We are pleased to announce the release of the Leica BLK360 Firmware v3.2.2.
This version can be loaded on all BLK360 and BLK360 SE devices of the latest generation.

This release notes contains important information about the Leica BLK360 firmware v3.2.2.

With immediate effect, the new firmware can be downloaded from myWorld Customer Portal:
<https://myworld-portal.leica-geosystems.com>

and Leica BLK360 website:

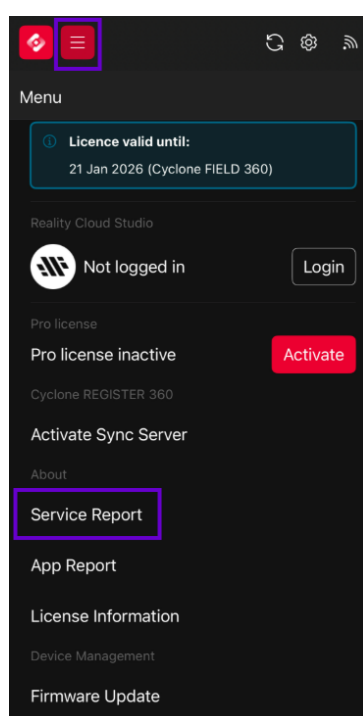

<https://shop.leica-geosystems.com/leica-blk/blk360/blk360-firmware>

What's new

- In rare cases devices went into warning state (yellow device LED) after starting a scan. This issue has been resolved, improving overall system stability.

Please note:

- A downgrade is not supported anymore.
- Please fully charge the batteries immediately upon receiving the device.
- Please remember that BLK360 Service reports can be sent to Support using the Leica Cyclone FIELD 360 app.

It is recommended to update your Leica BLK360 and BLK360 SE to the latest firmware version 3.2.2 to benefit from these enhancements.

Software compatibility

- Compatibility with mobile device apps:

- **iOS version**

Leica Cyclone FIELD 360 version 7.1.0 or higher is recommended.

Download iOS version here:

<https://apps.apple.com/us/app/leica-cyclone-FIELD-360/id1376463007>
