## What's New

N/A

## Bug Fixes

- Tasks to get stuck in the queue when importing projects.
- TruView SDK: Viewer.js throws an uncaught error.

## Deprecated Features

- TruView Enterprise is no longer supported on Windows 7, 8 and 8.1
- CLM versions prior to 2.5 are no longer supported.

## Known Issues

- If a project is published with the "Allow TV Measurement" setting Off you cannot exit picking mode and navigate to other setups.
- Assets names (assets associated with GeoTags) are shown with wrong names in TVC. They do not match with Register 360.
- GeoTags created in TV desktop are not present in TruView Enterprise/Cloud.

## Licensing

All users with a currently valid CCP or with CCP which was valid as late as 15 October 2020 will be eligible to receive a new license to run this version.
